APTITUDE & NOTICE BOARD

Aptitude session in classes helps individuals to be ready for the competitive exams for their placement as well as career development. Ongoing topics were been discussed and individual assessments were also been taken as main consideration for effective results.

DATE :- 25/11/2021 Aptitude Trick of the Day

Question :- If the price of rice is 30% less than that of wheat, then price of wheat is how much percent more than that of rice.

Solution :- let the price of wheat = Rs 100/-
 Price of rice = $100 - (30\% \text{ of } 100)$
 $= 100 - \left(\frac{30}{100} \times 100\right)$
 $= 100 - 30$
 $= 70$

$\Rightarrow \frac{\text{Difference in the prices}}{\text{Price of Rice (B)}} \times 100$

$\Rightarrow \frac{30}{70} \times 100$

$\frac{300}{7} = 42.85\%$

\therefore The price of wheat is 42.85% more than price of Rice.

WOMANHOOD

- Poem by

P. Sravani (B.com computers 2B)

From a girl enjoying her childhood,
To a woman experiencing her motherhood.
From a girl blaming herself for her own mistakes,
To a woman learning from her mistake.
From an insecure girl making wrong choices,
To a woman making right decisions.
From a girl being in her own shell,
To a woman exploring the world so well.
From a girl just concentrating on her beauty,
To a woman taking up responsibility.
From a girl having no dream,
To a woman working hard to be independent.
From being a weak insecure girl,
To a strong woman achieving her goals.
From a girl who was a free bird,
To a woman who became a Phoenix bird.

An article on Cryptocurrencies

By Adiba (B.Com Computers- 1B)

Cryptocurrencies is widely used online trading app. It was first introduced by Satoshi Nakamoto in 2009. It is an online market of shares of different companies where people invest. In simple words it is known as Bitcoin. But it is risky at the same time. The basic idea is that the cryptocurrencies work on a software. Many people from different states, districts and countries trade with digital assets. It has become very convenient for people to deal with these digital assets. Many people are preferring trade with digital assets but, because of the fluctuations in digital trading people are losing a lot of money. There are no file safes to protect people from making mistakes in this type of trades. People should have proper knowledge about online trading of digital assets. If a person does this type of trading without proper knowledge they may land on the wrong path.

I started my business in February 2020 with just ₹6000 but now one year later I sold more than 1000 products!! I did many mistakes, learned and growing with it. My family always supported me that's what kept me going and never give up on it. It's not always smooth, there are ups and down. Being a student isn't easy managing studies & work isn't easy but never stopped trying. Used every day to come a step closer towards my dream!!

2000 Rupee Note

Once a girl named Navya, who is kind and sweet saw an old man with a broken bowl, who looked hungry and even unable to beg, seeing that heart-breaking view she went near that old man and gave him a 2000 rupee note. without even seeing the note that old beggar joined the hands for Navya and started crying then She curiously asked the old man, "Uncle, it's just a 2000 rupee note why are you shedding tears while staring at it" listening to her innocent question that old beggar smiled and replied, "For a person like you It's just a 2000 rupee note but for me, it's a precious way to see my wife's smile that has been lost since we left our wedding hall!"
