Description

Designing and conducting business modules involves structuring educational or training programs that cover specific aspects of business knowledge and skills. Whether you are developing modules for academic courses, corporate training, or workshops, here is a step-by-step guide to help you conduct effective business modules:

- Clearly given the specific learning objectives for each module. What do you want participants to know or be able to do by the end of the module?
- Made them to understand the characteristics, background, and knowledge level of your target audience. Tailor the content to meet their needs and expectations.
- Divided the content into manageable modules based on topics or themes. Each module should have a logical flow of information.
- Developed content that aligns with the learning objectives. Use a variety of instructional methods, including presentations, case studies, interactive activities, and real-world examples.
- Included interactive elements such as discussions, group activities, and hands-on exercises to engage participants actively.
- Given assessments or evaluation tools to measure participants' understanding and application of the module content. This can include quizzes, assignments, or practical projects.

- Incorporate real-world scenarios and practical applications of business concepts to enhance relevance and applicability.
- If applicable, consider integrating technology tools or platforms that enhance the learning experience, such as online simulations, virtual reality, or interactive online modules.
- Use relevant case studies to illustrate theoretical concepts. Analyzing real business cases helps participants apply knowledge to practical situations.
- Invite industry experts or professionals to conduct sessions or share insights related to specific module topics. This adds real-world perspectives and enhances credibility.
- Implemented a feedback mechanism to collect input from participants. Use feedback to make continuous improvements to the content and delivery methods.
- Provided participants with support materials such as handouts, reference guides, or additional readings to reinforce learning.

Report Of The Program

Hardware knowledge sharing

Name of the Resource Person : T.Naga Srivalli

Date : 4-12-2020

Venue: : Seminar hall

No.of Students : 262

Description:

Knowledge sharing is the process of exchanging information, skills, or expertise among individuals or within a community. It involves open communication, collaboration, and the dissemination of insights to enhance collective understanding. This collaborative practice can occur through various means, such as conversations, documentation, training sessions, or digital platforms, fostering continuous learning and mutual growth. Effective knowledge sharing promotes innovation, problem-solving, and the development of a more informed and capable community or organization.

The Knowledge Sharing programme is one in which our students take part. Our programme provides a means for our students to apply their expertise to government schools. A diverse range of themes were presented to them by our students, including environmental protection, employment options, overcoming setbacks, and cleanliness. To illustrate the topics, our students bring along a number of helpful resources. Students are taught painting, handicrafts, and paper crafts through interactive activities. Our students conducted games in government school as a part of interactive session. Finally, in order to motivate the kids, they award rewards. Reaching the unreachable is a novel notion with this programme.

About College:

A brain child of the dynamic Sri. S.P.Sampathy, Siva Sivani Degree College (SSDC) was established in the year 2002. Affiliated to the Osmania University which has a rich legacy of imparting quality education. A part of the S.P. Sampathy's Siva Sivani Group of Institutions, whose founder late Sri. S.P.Sampathy and the cofounder Smt. S. Aarathy, presently the president and the chief executive of the group, have had the experience of establishing and running world class educational institutions for nearly 61 years, SSDC, has dutifully traversed on the path hitherto used by the other group institutions and has carved a niche for itself in the arena of under graduate education in a span of 21 years of timeless efforts.

Objectives of the program

- Mock interviews enabled students to gain experience in a real interview setting. They also gained feedback and advice from the interviewer, which helped them improve their interviewing skills

Description: Mock interviews enabled students to gain experience in a real interview setting. They also gained feedback and advice from the interviewer, which helped them improve their interviewing skills. Additionally, mock interviews allowed students to practice their responses to potential questions before their actual interviews. This gave them the opportunity to perfect their answers and feel more comfortable and confident when they went on their real interviews. Mock interviews were also valuable because they allowed students to identify any weaknesses in their interviewing skills, such as nervousness or poor body language, and work on improving them before the interviews.

Different methodologies were used while organising the mock interview These included having the students interviewed by faculty members, providing them with feedback, and conducting role-playing exercises. These activities allowed students to refine their interviewing skills before they entered the real job market.

Thematic Anaysis for Interviews

Name of the Resource Person : P. Vanaja

Date :8-9-2020

Venue: : Microsoft Teams

No.of Students : 280

Description:

Thematic analysis is a qualitative research method used to identify, analyze, and report patterns (themes) within data. In the context of an interview, thematic analysis involves systematically examining the interview transcripts to identify recurring patterns, topics, or themes that emerge from the participants' responses. Students were completely trained with these sessions to make them ready for the corporate rounds need to face for future growth. This type of analysis provides students with the skills to think critically and make connections between different concepts and ideas. It encourages students to be more proactive in their learning, as they must actively engage with the material and make logical connections in order to effectively analyze it. This skill is essential for success not only in academics, but also in future careers where critical thinking and problem-solving are highly valued. Thematic analysis tests help to develop these important skills in students, making them more prepared for the challenges they may face in the future.
